## HOOD FILTERS

SMARTER, GREENER & CLEANER

### WoolGuard Baffle Filters

#### WOOLGUARD HOOD FILTERS ARE UL & NSF LISTED AND MEET NFPA 96 STANDARDS.

Grease filters play a critical role in the overall safety and effectiveness of a kitchen exhaust system. There are many manufacturers of grease filters but not all filters have UL Listing. For ultimate safety of the exhaust system and to minimize liability issues, be sure that the filters that you select are UL Listed. This ensures that they meet NFPA standards.

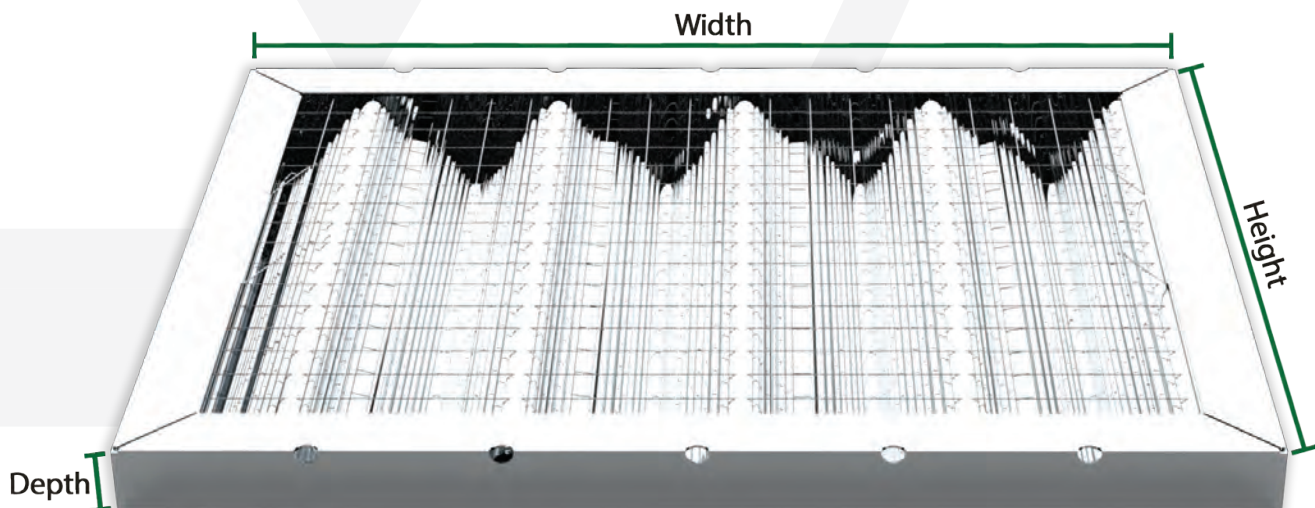

Working in concert with the surface fire suppression system, grease filters provide a strong defense against catastrophic duct system fires. WoolGuard Hood Filters are designed to remove 98% of the grease from the airstream before it enters the ductwork. The grease is captured in the disposable wool sheets where it can be easily removed. Selecting the proper number of the correct size filters is most important to ensure that the balance of the exhaust system will not be compromised and that all of the exhaust air passes through the filters before entering the ductwork.

#### HOW TO ORDER WOOLGUARD HOOD FILTERS

The Filters MUST be installed with baffles running in the vertical (top to bottom) position so the grease will run down the baffles to the grease trough in the hood. Standard sizes are ordered with the VERTICAL (top to bottom) dimension first, then the HORIZONTAL (left to right) dimension.

All filters are available with hooks for use in Captive-Aire style Hoods. ADD SUFFIX "C2" to model number.

All filters are available with Deflectors for use in High Heat Environments. ADD SUFFIX "DEF" to model number.

*Smarter, greener and cleaner way to keep your kitchen hood clean!*
